ingeniero pavimento de asfalto

tecnologías de tibio mezcla asfalto (WMA)

La perspectiva de los Estados Unidos

Washington DC, Estados
Unidos de América

TRANSPORT CHALLENGES FACING GROWTH

“Los esfuerzos colectivos de los organismos viales y socios de la industria para avanzar en las tecnologías de tibio mezcla asfalto, como una práctica estándar ha sido enorme.”

-Oficina de Tecnología de Pavimentos, FHWA

“[Nosotros] apoyar el desarrollo y la aplicación de tibio mezcla asfalto ... éste se convertirá inevitablemente en la práctica estándar para la producción de asfalto mezcla.”

- Alianza Global de Asfalto Pavimento

**Global
Asphalt
Pavement
Alliance**

“Tibio mezcla asfalto es el futuro de pavimentos flexibles en los Estados Unidos. ... bajar la producción y pavimentación temperaturas promete mejorar el consumo de energía, operaciones y calidad.”

-Mike Acott, Presidente, NAPA

“Tibio mezcla asfalto, proporciona una herramienta importante para el ingeniero pavimento ... diseñadores y contratistas por igual tienen ahora una gran oportunidad para aprender más acerca de esta práctica prometedora que está revolucionando la industria de la pavimentación en América del Norte.”

-Pete Grass, Presidente, Instituto de Asfalto

TRANSPORT CHALLENGES FACING GROWTH

Performance Metrics

INGENUITY IMAGINATION

INVENTION INNOVATION

1. By December 2011, 40 State DOTs and all Federal Lands Divisions will have a specification &/or contractual language that allows WMA on Federal-aid or Federal Lands projects.
✓ ***40 States + all FLHD (Complete)***
2. By December 2012, at least 30 State DOTs will have achieved set targets for WMA usage.
✓ **18 Total with set usage goals**

TRANSPORT CHALLENGES FACING GROWTH

Factors Driving Development

1

- Improve field compaction (density) → less variable → better performance!!!

2

- Environment- “Green Highway Construction”, reduce energy consumption and emissions

3

- Worker comfort

4

- Extend paving season and longer haul distances

Memorable Message

- **I.C. = I.P.**

Improved Compaction = Improved Performance

- **F.E.W. key benefits**

- Fuel
- Emissions
- Worker Comfort

TRANSPORT CHALLENGES FACING GROWTH

In 2010, use of WMA is estimated:

- We saved over 30 million gallons of fuel during production
- We reduced CO₂e by 800,000 tons
 - Equivalent to taking 150,000 vehicles off the road!
- If used 100% WMA ... **10 x**

Hot Mix Asphalt
@ 320°F (160 °C)

Warm Mix Asphalt
@ 250°F (121 °C)

Special Mixture Design Considerations and Methods for Warm Mix Asphalt - WEB-BASED

PROGRAM AREA: Pavements and Materials

COURSE NUMBER: FHWA-NHI-131137

CALENDAR YEAR	LENGTH	CEU	FEE
2011	2 Hours	0 Units	\$0 Per Participant
2012	2 Hours	0 Units	\$0 Per Participant

TRAINING LEVEL: Basic

CLASS SIZE: Minimum:1; Maximum:1

DESCRIPTION:

Highway transportation agencies are exploring the use of warm mix asphalt (WMA) for pavement projects. One of their main questions, particularly for agency mixture design technicians and engineers, is how WMA design differs from hot mix asphalt (HMA) design. "Mixture Design for Warm Mix Asphalt" is a Web-based training that presents the modifications to the current Superpave volumetric design procedure, as described in AASHTO R35, that are needed to complete a WMA mixture design. The training highlights key differences in WMA and HMA design procedures, and provides an opportunity to apply the AASHTO R35 standard practice to a WMA design modification.

OUTCOMES:

Upon completion of the course, participants will be able to:

Commercially Available Laboratory Foaming Devices

PTi – THE FOAMER

Wirtgen, WLB 10 S

InstroTek, Inc. – AccuFoamer
